

Enabling Governments to Securely Deliver Improved Services to Citizens

According to NSK Inc., half of the US government has moved to the cloud and more than \$2 billion annually is spent on cloud services. As both our national and local government organizations seek a more efficient, flexible and less expensive future, the adoption rate of the cloud continues to rise steadily in this sector each year. High security, data examination, and efficiency are crucial, and as such, government cloud projects are becoming bigger and more significant by the day.

NYI's cloud and data center solutions transform the way government IT departments are managed, by securely increasing IT capabilities and efficiencies that are cost or time prohibitive older infrastructures.

NYI's secure, HIPAA-compliant and SSAE 16-certified data centers are owned and operated, as well as optimized to run new and existing applications in the cloud, while complying with today's most stringent security standards.

We've got you covered – 100% Uptime Guaranteed

Why NYI for Government Tech?

- Customized solutions with direct access to enterprise cloud, colocation and hybrid configurations
- Data centers with 99.9999% uptime in strategic locations including – Manhattan, central New Jersey, Los Angeles and Seattle
- High level security with multiple layers of hardened physical and 24x7x365 on-site security, CCTV surveillance with digital storage, multiple layers of electronically controlled card access and Biometric access
- Flexible, future-proof infrastructure designed to lower IT costs and increase performance
- In-house government technology industry specialists to assist with solution design and deployment
- Earth-Conscious – Cold Aisle Containment at all NYI Data Centers mean more efficient, environmentally friendly operations

Just read what our clients have to say:

"By moving to NYI's fully redundant and secure facility, we were able to adhere to state guidelines and compliance regulations, as well as greatly enhance our business continuity plan – saving us time and money in the long run. As a government entity, we have to be ever-mindful of costs. NYI's highly cost effective solution was a pleasant surprise for us, considering its state-of-the-art facilities, quality services and exceptional customer service."

— CHRIS WADE, Network and Systems Engineer,
West Windsor Township (New Jersey Municipality)
